

1. What is the main difference between a tropical desert and a temperate desert?

- A. Tropical deserts are hotter than temperate deserts.
- B. Tropical deserts are drier than temperate deserts.
- C. Tropical deserts have more plant life than temperate deserts.
- D. Tropical deserts have more animal life than temperate deserts.

2. Which of the following is not a characteristic of a tropical desert?

- A. Low rainfall
- B. High temperatures
- C. High humidity
- D. Rocky terrain

3. Which of the following is not a type of tropical desert?

- A. Tundra
- B. Taiga
- C. Tropical rainforest
- D. Tropical dry forest

4. Which of the following is not a factor that contributes to the formation of a tropical desert?

- A. Low rainfall
- B. High temperatures
- C. High humidity
- D. Rocky terrain

5. What is the main difference between a tropical dry forest and a tropical rainforest?

- A. Tropical dry forests have more rainfall than tropical rainforests.
- B. Tropical dry forests have more plant life than tropical rainforests.
- C. Tropical dry forests have more animal life than tropical rainforests.
- D. Tropical dry forests have a more diverse range of plant and animal life than tropical rainforests.

6. Which of the following is not a type of tropical dry forest?

- A. Deciduous forest
- B. Coniferous forest
- C. Tropical rainforest
- D. Tropical dry forest

7. Which of the following is not a factor that contributes to the formation of a tropical dry forest?

- A. Low rainfall
- B. High temperatures
- C. High humidity
- D. Rocky terrain

8. What is the main difference between a tropical rainforest and a tropical dry forest?

- A. Tropical rainforests have more rainfall than tropical dry forests.
- B. Tropical rainforests have more plant life than tropical dry forests.

- C. Tropical rainforests have more animal life than tropical dry forests.
- D. Tropical rainforests have a more diverse range of plant and animal life than tropical dry forests.

9. Which of the following is not a type of tropical rainforest?

- A. Deciduous forest
- B. Coniferous forest
- C. Tropical rainforest
- D. Tropical dry forest

10. Which of the following is not a factor that contributes to the formation of a tropical rainforest?

- A. Low rainfall
- B. High temperatures
- C. High humidity
- D. Rocky terrain

Answer Key:

- 1. B
- 2. C
- 3. A
- 4. D
- 5. D
- 6. C
- 7. D
- 8. B
- 9. C
- 10. D
