

1. What is the name for the naming system that uses a combination of the chemical's structure and its function?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Stock nomenclature

2. What is the name for the naming system that uses the chemical's structure to determine its name?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Stock nomenclature

3. What is the name for the naming system that uses the chemical's function to determine its name?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Stock nomenclature

4. What is the name for the naming system that uses the chemical's stock number to determine its name?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Stock nomenclature

5. Which of the following is not a type of nomenclature?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Alphabetical nomenclature

6. Which of the following is not a type of nomenclature?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Stock nomenclature

7. Which of the following is not a type of nomenclature?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Molecular nomenclature

8. Which of the following is not a type of nomenclature?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature

D. Inorganic nomenclature

9. Which of the following is not a type of nomenclature?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Organic nomenclature

10. What is the name for the naming system that uses the chemical's structure and its function to determine its name?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Stock nomenclature

11. What is the name for the naming system that uses the chemical's structure, its function, and its stock number to determine its name?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Stock nomenclature

12. What is the name for the naming system that uses the chemical's structure, its function, its stock number, and the alphabet to determine its name?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Stock nomenclature

13. What is the name for the naming system that uses the chemical's structure, its function, its stock number, the alphabet, and numbers to determine its name?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Stock nomenclature

14. What is the name for the naming system that uses the chemical's structure, its function, its stock number, the alphabet, numbers, and symbols to determine its name?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Stock nomenclature

15. What is the name for the naming system that uses the chemical's structure, its function, its stock number, the alphabet, numbers, symbols, and the periodic table to determine its name?

- A. Functional group nomenclature
- B. IUPAC nomenclature
- C. Common nomenclature
- D. Stock nomenclature

1. B. IUPAC nomenclature
2. B. IUPAC nomenclature
3. A. Functional group nomenclature
4. D. Stock nomenclature
5. D. Alphabetical nomenclature
6. D. Stock nomenclature
7. D. Molecular nomenclature
8. D. Inorganic nomenclature
9. D. Organic nomenclature
10. B. IUPAC nomenclature
11. B. IUPAC nomenclature
12. B. IUPAC nomenclature
13. B. IUPAC nomenclature
14. B. IUPAC nomenclature
15. B. IUPAC nomenclature
