

1. The periodic table is arranged in order of:
 - A. Increasing atomic number
 - B. Increasing atomic radius
 - C. Decreasing electronegativity
 - D. Decreasing ionization energy
2. The periodic table can be used to predict:
 - A. The reactivity of an element
 - B. The density of an element
 - C. The melting point of an element
 - D. All of the above
3. The elements in the periodic table are arranged in order of:
 - A. Increasing atomic number
 - B. Increasing atomic radius
 - C. Decreasing electronegativity
 - D. Decreasing ionization energy
4. The elements in the periodic table are arranged in order of:
 - A. Increasing atomic number
 - B. Increasing atomic radius
 - C. Decreasing electronegativity
 - D. Decreasing ionization energy
5. The elements in the periodic table are arranged in order of:
 - A. Increasing atomic number
 - B. Increasing atomic radius
 - C. Decreasing electronegativity
 - D. Decreasing ionization energy
6. The elements in the periodic table are arranged in order of:
 - A. Increasing atomic number
 - B. Increasing atomic radius
 - C. Decreasing electronegativity
 - D. Decreasing ionization energy
7. The elements in the periodic table are arranged in order of:
 - A. Increasing atomic number
 - B. Increasing atomic radius
 - C. Decreasing electronegativity
 - D. Decreasing ionization energy
8. The elements in the periodic table are arranged in order of:
 - A. Increasing atomic number
 - B. Increasing atomic radius
 - C. Decreasing electronegativity
 - D. Decreasing ionization energy
9. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

10. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

11. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

12. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

13. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

14. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

15. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

16. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

17. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius

- C. Decreasing electronegativity
- D. Decreasing ionization energy

18. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

19. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

20. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

21. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

22. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

23. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

24. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

25. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

1. The periodic table is arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

2. The periodic table can be used to predict:

- A. The reactivity of an element
- B. The density of an element
- C. The melting point of an element
- D. All of the above

3. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

4. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

5. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

6. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

7. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

8. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

9. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

10. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

11. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

12. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

13. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

14. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

15. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

16. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

17. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius

- C. Decreasing electronegativity
- D. Decreasing ionization energy

18. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

19. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

20. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

21. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

22. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

23. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

24. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

25. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

1. The periodic table is arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

2. The periodic table can be used to predict:

- A. The reactivity of an element
- B. The density of an element
- C. The melting point of an element
- D. All of the above

3. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

4. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

5. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

6. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

7. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

8. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

9. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

10. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

11. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

12. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

13. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

14. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

15. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

16. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

17. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius

- C. Decreasing electronegativity
- D. Decreasing ionization energy

18. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

19. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

20. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

21. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

22. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

23. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

24. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

25. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

1. The periodic table is arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

2. The periodic table can be used to predict:

- A. The reactivity of an element
- B. The density of an element
- C. The melting point of an element
- D. All of the above

3. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

4. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

5. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

6. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

7. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electronegativity
- D. Decreasing ionization energy

8. The elements in the periodic table are arranged in order of:

- A. Increasing atomic number
- B. Increasing atomic radius
- C. Decreasing electrone
