

1. Which of the following is not a type of industrial genetics?
 - A. Agricultural genetics
 - B. Medical genetics
 - C. Forensic genetics
 - D. Environmental genetics
2. Which of the following is not a tool used in industrial genetics?
 - A. Gene sequencing
 - B. Gene editing
 - C. Genetic engineering
 - D. Genetic counseling
3. What is the main goal of industrial genetics?
 - A. To improve the quality of life for humans
 - B. To increase the food supply
 - C. To create new and improved products
 - D. To understand the human genome
4. What are the potential risks associated with industrial genetics?
 - A. Environmental contamination
 - B. Human health risks
 - C. Animal welfare concerns
 - D. All of the above
5. What are the potential benefits associated with industrial genetics?
 - A. Increased food supply
 - B. Improved human health
 - C. New and improved products
 - D. All of the above

Answer Key:

1. D
2. D
3. C
4. D
5. D
