

1. What is the role of the ocean in the global climate?
 - A. The ocean has a minor role in the global climate
 - B. The ocean has a moderate role in the global climate
 - C. The ocean has a major role in the global climate
 - D. The ocean has an unknown role in the global climate
2. What are the three main oceanic processes that affect the global climate?
 - A. Solar radiation, ocean currents, and waves
 - B. Solar radiation, ocean currents, and tides
 - C. Solar radiation, ocean currents, and El Nino
 - D. Solar radiation, ocean currents, and the Gulf Stream
3. How does the ocean affect the global climate?
 - A. The ocean has a minor role in the global climate
 - B. The ocean has a moderate role in the global climate
 - C. The ocean has a major role in the global climate
 - D. The ocean has an unknown role in the global climate
4. What are the three main ways that the ocean affects the global climate?
 - A. Solar radiation, ocean currents, and waves
 - B. Solar radiation, ocean currents, and tides
 - C. Solar radiation, ocean currents, and El Nino
 - D. Solar radiation, ocean currents, and the Gulf Stream
5. How does the ocean affect the Earth's climate?
 - A. The ocean has a minor role in the Earth's climate
 - B. The ocean has a moderate role in the Earth's climate
 - C. The ocean has a major role in the Earth's climate
 - D. The ocean has an unknown role in the Earth's climate
6. What are the three main ways that the ocean affects the Earth's climate?
 - A. Solar radiation, ocean currents, and waves
 - B. Solar radiation, ocean currents, and tides
 - C. Solar radiation, ocean currents, and El Nino
 - D. Solar radiation, ocean currents, and the Gulf Stream
7. What is the role of the ocean in the global climate?
 - A. The ocean has a minor role in the global climate
 - B. The ocean has a moderate role in the global climate
 - C. The ocean has a major role in the global climate
 - D. The ocean has an unknown role in the global climate
8. What are the three main oceanic processes that affect the global climate?
 - A. Solar radiation, ocean currents, and waves
 - B. Solar radiation, ocean currents, and tides
 - C. Solar radiation, ocean currents, and El Nino
 - D. Solar radiation, ocean currents, and the Gulf Stream
9. How does the ocean affect the global climate?

- A. The ocean has a minor role in the global climate
- B. The ocean has a moderate role in the global climate
- C. The ocean has a major role in the global climate
- D. The ocean has an unknown role in the global climate

10. What are the three main ways that the ocean affects the global climate?

- A. Solar radiation, ocean currents, and waves
- B. Solar radiation, ocean currents, and tides
- C. Solar radiation, ocean currents, and El Nino
- D. Solar radiation, ocean currents, and the Gulf Stream

11. How does the ocean affect the Earth's climate?

- A. The ocean has a minor role in the Earth's climate
- B. The ocean has a moderate role in the Earth's climate
- C. The ocean has a major role in the Earth's climate
- D. The ocean has an unknown role in the Earth's climate

12. What are the three main ways that the ocean affects the Earth's climate?

- A. Solar radiation, ocean currents, and waves
- B. Solar radiation, ocean currents, and tides
- C. Solar radiation, ocean currents, and El Nino
- D. Solar radiation, ocean currents, and the Gulf Stream

13. What is the role of the ocean in the global climate?

- A. The ocean has a minor role in the global climate
- B. The ocean has a moderate role in the global climate
- C. The ocean has a major role in the global climate
- D. The ocean has an unknown role in the global climate

14. What are the three main oceanic processes that affect the global climate?

- A. Solar radiation, ocean currents, and waves
- B. Solar radiation, ocean currents, and tides
- C. Solar radiation, ocean currents, and El Nino
- D. Solar radiation, ocean currents, and the Gulf Stream

15. How does the ocean affect the global climate?

- A. The ocean has a minor role in the global climate
- B. The ocean has a moderate role in the global climate
- C. The ocean has a major role in the global climate
- D. The ocean has an unknown role in the global climate

16. What are the three main ways that the ocean affects the global climate?

- A. Solar radiation, ocean currents, and waves
- B. Solar radiation, ocean currents, and tides
- C. Solar radiation, ocean currents, and El Nino
- D. Solar radiation, ocean currents, and the Gulf Stream

17. How does the ocean affect the Earth's climate?

- A. The ocean has a minor role in the Earth's climate
- B. The ocean has a moderate role in the Earth's climate

- C. The ocean has a major role in the Earth's climate
- D. The ocean has an unknown role in the Earth's climate

18. What are the three main ways that the ocean affects the Earth's climate?

- A. Solar radiation, ocean currents, and waves
- B. Solar radiation, ocean currents, and tides
- C. Solar radiation, ocean currents, and El Nino
- D. Solar radiation, ocean currents, and the Gulf Stream

19. What is the role of the ocean in the global climate?

- A. The ocean has a minor role in the global climate
- B. The ocean has a moderate role in the global climate
- C. The ocean has a major role in the global climate
- D. The ocean has an unknown role in the global climate

20. What are the three main oceanic processes that affect the global climate?

- A. Solar radiation, ocean currents, and waves
- B. Solar radiation, ocean currents, and tides
- C. Solar radiation, ocean currents, and El Nino
- D. Solar radiation, ocean currents, and the Gulf Stream

21. How does the ocean affect the global climate?

- A. The ocean has a minor role in the global climate
- B. The ocean has a moderate role in the global climate
- C. The ocean has a major role in the global climate
- D. The ocean has an unknown role in the global climate

22. What are the three main ways that the ocean affects the global climate?

- A. Solar radiation, ocean currents, and waves
- B. Solar radiation, ocean currents, and tides
- C. Solar radiation, ocean currents, and El Nino
- D. Solar radiation, ocean currents, and the Gulf Stream

23. How does the ocean affect the Earth's climate?

- A. The ocean has a minor role in the Earth's climate
- B. The ocean has a moderate role in the Earth's climate
- C. The ocean has a major role in the Earth's climate
- D. The ocean has an unknown role in the Earth's climate

24. What are the three main ways that the ocean affects the Earth's climate?

- A. Solar radiation, ocean currents, and waves
- B. Solar radiation, ocean currents, and tides
- C. Solar radiation, ocean currents, and El Nino
- D. Solar radiation, ocean currents, and the Gulf Stream

25. What is the role of the ocean in the global climate?

- A. The ocean has a minor role in the global climate
- B. The ocean has a moderate role in the global climate
- C. The ocean has a major role in the global climate
- D. The ocean has an unknown role in the global climate

1. C. The ocean has a major role in the global climate
2. B. Solar radiation, ocean currents, and tides
3. C. The ocean has a major role in the global climate
4. C. Solar radiation, ocean currents, and El Nino
5. C. The ocean has a major role in the Earth's climate
6. C. Solar radiation, ocean currents, and El Nino
7. C. The ocean has a major role in the global climate
8. C. Solar radiation, ocean currents, and El Nino
9. C. The ocean has a major role in the global climate
10. C. Solar radiation, ocean currents, and El Nino
11. C. The ocean has a major role in the Earth's climate
12. C. Solar radiation, ocean currents, and El Nino
13. C. The ocean has a major role in the global climate
14. C. Solar radiation, ocean currents, and El Nino
15. C. The ocean has a major role in the global climate
16. C. Solar radiation, ocean currents, and El Nino
17. C. The ocean has a major role in the Earth's climate
18. C. Solar radiation, ocean currents, and El Nino
19. C. The ocean has a major role in the global climate
20. C. Solar radiation, ocean currents, and El Nino
21. C. The ocean has a major role in the global climate
22. C. Solar radiation, ocean currents, and El Nino
23. C. The ocean has a major role in the Earth's climate
24. C. Solar radiation, ocean currents, and El Nino
25. C. The ocean has a major role in the global climate
