

1. What is the best way to design and build simple electronic circuits for CS 2040 Embedded Systems?

- a. Use a breadboard and jumper wires
- b. Use a printed circuit board (PCB) and solder
- c. Use a breadboard and solder
- d. Use a PCB and jumper wires

2. What is the best way to power your circuit?

- a. Use a 9V battery
- b. Use a 12V power supply
- c. Use a USB power supply
- d. Use an AC power supply

3. What is the best way to connect your circuit to a computer?

- a. Use a USB cable
- b. Use an Ethernet cable
- c. Use a parallel cable
- d. Use a serial cable

4. What is the best way to connect your circuit to the internet?

- a. Use a WiFi connection
- b. Use a cellular connection
- c. Use a satellite connection
- d. Use a wired connection

5. What is the best way to store your data?

- a. Use a microSD card
- b. Use a USB flash drive
- c. Use an external hard drive
- d. Use a cloud storage service

1. What is the best way to design and build simple electronic circuits for CS 2040 Embedded Systems?
