

1. What is the primary role of humans in tropical ecosystems?
 - A. To provide food and shelter for other animals
 - B. To conserve and protect the environment
 - C. To exploit natural resources for economic gain
 - D. To promote the growth of plants and animals
2. What is the primary impact of human activity on tropical ecosystems?
 - A. Deforestation
 - B. Pollution
 - C. Habitat destruction
 - D. All of the above
3. What are the consequences of deforestation in tropical ecosystems?
 - A. Soil erosion
 - B. Climate change
 - C. Loss of biodiversity
 - D. All of the above
4. What are the consequences of climate change in tropical ecosystems?
 - A. Changes in precipitation patterns
 - B. Extreme weather events
 - C. Spread of disease
 - D. All of the above
5. What are the consequences of the loss of biodiversity in tropical ecosystems?
 - A. Ecosystems become less productive
 - B. Ecosystems become more vulnerable to disturbance
 - C. Services provided by ecosystems are lost
 - D. All of the above
6. What can be done to mitigate the impact of human activity on tropical ecosystems?
 - A. Sustainable management of natural resources
 - B. Restoration of degraded ecosystems
 - C. Conservation of intact ecosystems

D. All of the above

7. What is the best way to conserve tropical ecosystems?

A. Establishing protected areas

B. Promoting sustainable use of natural resources

C. Reducing deforestation

D. All of the above

Answer Key: 1. C; 2. D; 3. D; 4. D; 5. D; 6. D; 7. D
