

1. What is the study of microbiology?

- A. The study of microorganisms
- B. The study of the history of microorganisms
- C. The study of the structure and function of microorganisms
- D. The study of the interaction of microorganisms with their environment

2. What is the history of microbiology?

- A. The study of microorganisms
- B. The study of the history of microorganisms
- C. The study of the structure and function of microorganisms
- D. The study of the interaction of microorganisms with their environment

3. What are microorganisms?

- A. The study of microorganisms
- B. The study of the history of microorganisms
- C. The study of the structure and function of microorganisms
- D. The study of the interaction of microorganisms with their environment

4. What is the structure and function of microorganisms?

- A. The study of microorganisms
- B. The study of the history of microorganisms
- C. The study of the structure and function of microorganisms
- D. The study of the interaction of microorganisms with their environment

5. What is the interaction of microorganisms with their environment?

- A. The study of microorganisms
- B. The study of the history of microorganisms
- C. The study of the structure and function of microorganisms
- D. The study of the interaction of microorganisms with their environment

Answer Key:

- 1. A
- 2. B
- 3. C
- 4. D
- 5. E
