

1. Which of the following is not a type of mating system?
 - a. Monogamy
 - b. Polygamy
 - c. Promiscuity
 - d. Serial Monogamy
2. Which of the following is not a benefit of monogamy?
 - a. Increased parental investment in offspring
 - b. Reduced competition for mates
 - c. Increased genetic diversity in offspring
 - d. Increased likelihood of survival
3. Which of the following is not a benefit of polygamy?
 - a. Increased parental investment in offspring
 - b. Reduced competition for mates
 - c. Increased genetic diversity in offspring
 - d. Increased likelihood of survival
4. Which of the following is not a benefit of promiscuity?
 - a. Increased parental investment in offspring
 - b. Reduced competition for mates
 - c. Increased genetic diversity in offspring
 - d. Increased likelihood of survival
5. Which of the following is not a benefit of serial monogamy?
 - a. Increased parental investment in offspring
 - b. Reduced competition for mates
 - c. Increased genetic diversity in offspring
 - d. Increased likelihood of survival
6. Which of the following is not a factor that influences mating system choice?
 - a. The number of potential mates
 - b. The level of parental investment required
 - c. The level of competition for mates
 - d. The likelihood of survival
7. Which of the following is not a type of polygamy?
 - a. Monogamy
 - b. Polygyny
 - c. Polyandry
 - d. Serial Monogamy
8. Which of the following is not a type of promiscuity?
 - a. Monogamy
 - b. Polygyny
 - c. Polyandry
 - d. Serial Monogamy
9. Which of the following is not a type of serial monogamy?

- a. Monogamy
- b. Polygyny
- c. Polyandry
- d. Serial Monogamy

10. Which of the following is not a reason why animals might choose to be monogamous?

- a. To increase parental investment in offspring
- b. To reduce competition for mates
- c. To increase genetic diversity in offspring
- d. To increase the likelihood of survival

11. Which of the following is not a reason why animals might choose to be polygamous?

- a. To increase parental investment in offspring
- b. To reduce competition for mates
- c. To increase genetic diversity in offspring
- d. To increase the likelihood of survival

12. Which of the following is not a reason why animals might choose to be promiscuous?

- a. To increase parental investment in offspring
- b. To reduce competition for mates
- c. To increase genetic diversity in offspring
- d. To increase the likelihood of survival

13. Which of the following is not a reason why animals might choose to be serial monogamous?

- a. To increase parental investment in offspring
- b. To reduce competition for mates
- c. To increase genetic diversity in offspring
- d. To increase the likelihood of survival

14. Which of the following is not a factor that influences the choice of mating system?

- a. The number of potential mates
- b. The level of parental investment required
- c. The level of competition for mates
- d. The likelihood of survival

15. Which of the following is not a benefit of polygamy?

- a. Increased parental investment in offspring
- b. Reduced competition for mates
- c. Increased genetic diversity in offspring
- d. Increased likelihood of survival

16. Which of the following is not a benefit of promiscuity?

- a. Increased parental investment in offspring
- b. Reduced competition for mates
- c. Increased genetic diversity in offspring
- d. Increased likelihood of survival

17. Which of the following is not a benefit of serial monogamy?

- a. Increased parental investment in offspring
- b. Reduced competition for mates
- c. Increased genetic diversity in offspring
- d. Increased likelihood of survival

18. Which of the following is not a factor that influences mating system choice?

- a. The number of potential mates
- b. The level of parental investment required
- c. The level of competition for mates
- d. The likelihood of survival

19. Which of the following is not a type of polygamy?

- a. Monogamy
- b. Polygyny
- c. Polyandry
- d. Serial Monogamy

20. Which of the following is not a type of promiscuity?

- a. Monogamy
- b. Polygyny
- c. Polyandry
- d. Serial Monogamy

21. Which of the following is not a type of serial monogamy?

- a. Monogamy
- b. Polygyny
- c. Polyandry
- d. Serial Monogamy

22. Which of the following is not a reason why animals might choose to be monogamous?

- a. To increase parental investment in offspring
- b. To reduce competition for mates
- c. To increase genetic diversity in offspring
- d. To increase the likelihood of survival

23. Which of the following is not a reason why animals might choose to be polygamous?

- a. To increase parental investment in offspring
- b. To reduce competition for mates
- c. To increase genetic diversity in offspring
- d. To increase the likelihood of survival

24. Which of the following is not a reason why animals might choose to be promiscuous?

- a. To increase parental investment in offspring
- b. To reduce competition for mates
- c. To increase genetic diversity in offspring
- d. To increase the likelihood of survival

25. Which of the following is not a reason why animals might choose to be serial monogamous?

- a. To increase parental investment in offspring
- b. To reduce competition for mates
- c. To increase genetic diversity in offspring
- d. To increase the likelihood of survival
