

1. Which of the following is not a role of microorganisms in industry?
  - A. They are used to produce food and beverages.
  - B. They are used to produce antibiotics.
  - C. They are used to produce biodegradable plastics.
  - D. They are used to produce gasoline.
2. Which of the following is not a type of microorganism used in industry?
  - A. Bacteria
  - B. Fungi
  - C. Algae
  - D. Viruses
3. Which of the following is not a food or beverage produced by microorganisms?
  - A. Beer
  - B. Wine
  - C. Bread
  - D. Cheese
4. Which of the following is not an antibiotic produced by microorganisms?
  - A. Penicillin
  - B. Streptomycin
  - C. Tetracycline
  - D. Aspirin
5. Which of the following is not a biodegradable plastic produced by microorganisms?
  - A. Polylactic acid
  - B. Polyhydroxyalkanoate
  - C. Polyethylene
  - D. Polypropylene
6. Which of the following is not a gasoline component produced by microorganisms?
  - A. Ethanol
  - B. Methane
  - C. Butane
  - D. Propane
7. Which of the following is not a method of microorganism production?
  - A. Fermentation
  - B. Incubation
  - C. Pasteurization
  - D. Autoclaving

Answer Key: 1. D, 2. D, 3. D, 4. D, 5. C, 6. D, 7. C
