- 1. What is the purpose of antialiasing?
- A. To improve the quality of the image
- B. To reduce the number of colors in the image
- C. To reduce the number of pixels in the image
- D. To reduce the appearance of jagged edges in the image
- 2. Which of the following is not a type of antialiasing?
- A. Multisample antialiasing
- B. Supersample antialiasing
- C. Texture antialiasing
- D. Geometry antialiasing
- 3. Which of the following is not a advantage of antialiasing?
- A. It can improve the quality of the image
- B. It can reduce the number of colors in the image
- C. It can reduce the number of pixels in the image
- D. It can reduce the appearance of jagged edges in the image
- 4. Which of the following is not a disadvantage of antialiasing?
- A. It can increase the number of colors in the image
- B. It can increase the number of pixels in the image
- C. It can increase the size of the image
- D. It can decrease the quality of the image
- 5. What is the most common type of antialiasing?
- A. Multisample antialiasing
- B. Supersample antialiasing
- C. Texture antialiasing
- D. Geometry antialiasing

Answer Key: 1. D, 2. D, 3. B, 4. A, 5. A
