- 1. How has the study of evolution impacted the history of life on Earth?
- A. It has helped us to understand how life on Earth began.
- B. It has helped us to understand how different species have evolved over time.
- C. It has helped us to understand how the environment has changed over time.
- D. All of the above.
- 2. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 3. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 4. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 5. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.

- 6. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 7. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 8. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 9. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 10. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.

- D. All of the above.
- 11. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 12. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 13. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 14. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 15. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over

time.

- D. All of the above.
- 16. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 17. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 18. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 19. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 20. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.

- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 21. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 22. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 23. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 24. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.
- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 25. What is one way that the study of evolution has helped us to understand the history of life on Earth?
- A. It has helped us to understand how different species have evolved over time.

- B. It has helped us to understand how the environment has changed over time.
- C. It has helped us to understand how different populations have interacted over time.
- D. All of the above.
- 1. D 2. A 3. B 4. C 5. D 6. A 7. B 8. C 9. D 10. A 11. B 12. C 13. D 14. A 15. B 16. C 17. D 18. A 19. B 20. C 21. D 22. A 23. B 24. C 25. D
